

ENVTECH[®]

Clean Environment

Water is what we are; water is what we do..

About us

EnvTech is an engineering solutions and services provider, founded in 2013 as a privately owned Saudi company. Since then it has developed into one of the most dynamic companies in the market of water, wastewater, and sludge treatment. EnvTech offers a full range of solutions, services and equipment to meet the exacting requirements of the clients.

Vision

To be a regional provider of new & traditional technologies and innovative solutions in the areas of water treatment & water reuse that deliver greater cost efficiency through energy savings and water conservation.

Values

- Customer focus
- Accountability
- Transparency
- Teamwork
- Quality

Why Envtech?

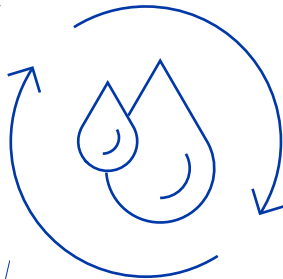

1. EnvTech has a dedicated team of highly qualified designers, engineers, and technicians who make sure every client gets the solution that perfectly meets their exacting requirements.
2. EnvTech works with top-of-the line partners to ensure its solutions are long-lasting, trouble-free, and reasonably priced.
3. EnvTech believes every client is a partner, that's how we build long term relationships.

Water, wastewater,
sludge - we provide
solutions to treat all
and help the
environment..

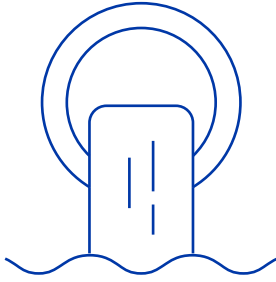

Business Area

provide the full-range of solutions, services & equipment necessary for water and wastewater treatment and cover the following business areas

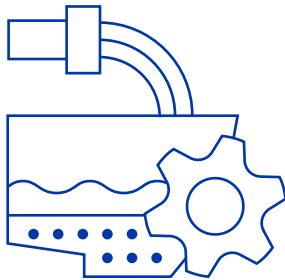

WATER TREATMENT

Process of making water suitable for its applications such as drinking water, processed water ... etc. This process happens by removing chemicals, biological contaminants, suspended solids and gases from water. We offer full equipment like Reverse Osmosis Plants, Pumps, Filtration units, chemical Dosing sets, UV units, Ozone Disinfection systems, etc.

WASTEWATER TREATMENT

Systems remove contaminants in wastewater to comply with the international standards and local regulations. Physical, chemical, and biological processes are used to remove contaminants and produce treated wastewater. We offer full range of equipment like scrapers, screens, oil and grit removal units, filtration units, clarifiers, etc.

SLUDGE TREATMENT

Byproduct of the sewage treatment process, it is digested for stabilization and is then dewatered for easier handling. Dry and wet waste systems manage mixed or recyclable waste in a way that is safe, environmentally friendly, and energy efficient, reducing the volume through compaction, drying, and burning. We offer incinerators, bio sludge treatment units, dryers, and other waste compaction equipment, all designed with cost-effective installation and maintenance.

We offer a full range of solutions, services, and equipment for the treatment of water, wastewater, and sludge, which meet the exact requirements of our clients..

Equipment List

Pre Treatment

1. Multi-Rake Screen
2. Climber Screen
3. Grab Screen
4. Perforated Belt Screen
5. Step Screen
6. Inclined Drum Screen
7. Vertical Screw Screen
8. Basket Screen
9. Storm Water Screen
10. Washing Compactor
11. Screw Conveyor
12. Circular Grit Trap (Vortex)
13. Longitudinal Grit Trap
14. Grit Classifier
15. Grit Washer
16. Grinders and Macerators

Secondary Treatment

1. Fine & Coarse Bubble Diffusers
2. Mixers & Aerators
3. Chain Scraper
4. Longitudinal Bridge Scraper
5. Circular Tank Scraper
6. Scum Remover (Skimmer)

Tertiary Treatment

1. Gravity Sand Filters
2. Rotary Disc Filters
3. Activated Carbon Absorption
4. Membrane Filtration and Separation

Sludge Treatment

1. Belt Filter Press
2. Bag Dryer
3. Screw Drain Thickener
4. Polymer Preparation Unit
5. Centrifuge
6. Sludge Drying
7. Silo Component
8. Solid & Sludge Pumps

Odor Control

1. Bio Filter
2. Activated Carbon Filter
3. Wet Scrubber
4. Bio-Trickling Filter
5. Photoionization

Instrumentations & Dosing

1. Field Instruments
2. Water Lab
3. Flow Measuring
4. Level & Pressure Sensors
5. Disinfection Systems
6. Chemical Dosing

Pumping Equipment & Flow Regulation

1. End-Suction Centrifugal Pumps
2. Submersible Pumps
3. Split Case Pumps
4. Vertical Turbine Pumps
5. Solid & Sludge Pumps
6. Penstocks & Weirs
7. Valves
8. Water Hammer Protection Equipment

We believe in
quality and
reliability..

Our Partners

To meet the exacting requirements of our clients, we work with the best in business technology partners :
